

**barduva**

UAB **Barduva** was founded in 1996 in Lithuania. Now the company introduces a high quality platform lift BA-100 to the European market. Lift BA-100 is the result of our long time work and experience in collaboration with the most famous partners in Europe. We do not seek to be innovators, we offer the optimal solution of quality, reliability and price.

1

### **What lift do you need?**

High technology and modern design?

Reliable and safe?

High quality for good price?

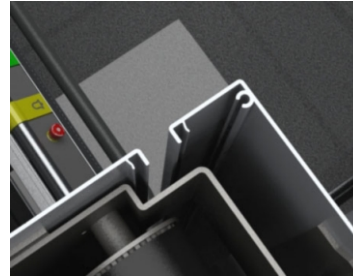

**We offer a practical decision for a more comfortable life!**

- Aesthetic lift design is created by anodized aluminium profiles with glass or steel panels and panoramic doors.
- It is suitable for both internal and external applications.
- Easy installation: no need a pit (under the necessity a pit is 50 mm or a small ramp), masonry works to accommodate the lift, or a special room for the control's system.

### **Why to choose lift BA-100?**

- Lift BA-100 is a vertical platform lift adapted to the persons with impaired mobility.
- Belt-driven system is smooth running, silent and without any jerky stops and starts.
- Control of belt condition.
- Simple and comfortable to use.
- Modern construction hides the lift mechanisms and extends an inner space of the lift.
- 2 years guarantee.

Platform lift BA-100 is available with single hinged doors or gates even from three sides at the same landing. For your convenience, it is a large choice of RAL colours, suitable for all environments.

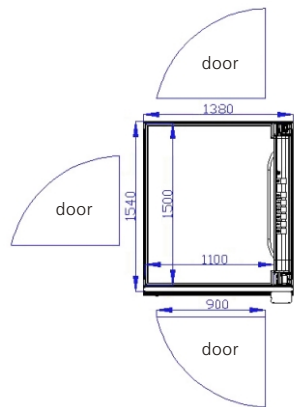

It is easy and comfortable to control the lifting process by yourself because of an ergonomical and functional deployment of the push buttons and hold to run control.

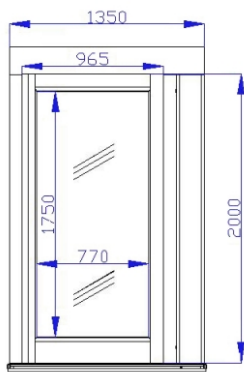

### Technical Specifications
